Price list of Gladioli.

# Our *Gladiolus* for Season 1925 will Help Beautify the Homes of America

JAN 26 1925

In my younger days, and that was several years ago I had the good fortune to get a position with a well known nursery. At the time, wages for this sort of work were rather low and as I always liked flowers, this early training, has come in good these later years for if you once learn the trade and like it, the knowledge never departs from you.

If you are a lover of flowers, and like them all, there is always some one kind you like better than all the rest. You will be quick to acknowledge this. We must have a hobby also to make a real success of anything. The better you like or ride this hobby, whether it be chickens, bees, gardening or what not, the better your success.

Gladiolus growing is my first and last love. We grow peonies also, for the reason that others like these better than anything else, and are in it for what honest profit there is to be made. Gladiolus offer one a great field of operation and study. Such an infinite variety of coloring can hardly come from any other source. The growing of seedlings with its never ending curiosity as to what will burst out to your vision, the study and care it takes to produce good bloom, will never get tiresome to a real gladioli fan.

We are glad to get your business and want you to look the list over from start to finish. If we then get an order, well and good. If the other fellow gets it, he will likely need it and that is good too.

In studying the list of prices and sizes, do not think you must get the largest bulbs to get good bloom. Most of bulbs of No.'s 3 and 4 will produce good bloom the first year of planting and the increase is much greater than with the larger bulbs. This is for your information but buy what you want.

We buy everything for cash and sell for cash. We do not sell on credit except to large growers of good standing. We believe in the policy of paying as you go. Have done this for many years, so we ask it of our customers. You will get just as much as you ask for and just what you ask for. What more do you want? My desire is to hold every customer.

Mixtures are made up of all varieties and while not mixed on purpose, these produce very fine bloom but lack names only. Many high priced bulbs get into mixtures by accident. These can be bought at \$2.00 per 100 bulbs of blooming size and will please you.

Should you care to have the named varieties we will mail to your address prepaid, eight varieties of 25 each making a total of 200 bulbs all blooming size, for \$5.00. Or, one half of the above order at \$2.50.

Bulbs singly or in dozen lots prepaid by us. Order not to be less than \$2.00. All bulbs by the 100 at the buyers expense. 1000 bulbs at nine times the 100 rate. Six bulbs at dozen rate, 25 bulbs at 100 rate if of one kind.

We are located on a main highway between Cleveland and Buffalo and when this way, in season of bloom or any time, just stop and see us. Every grower should belong to the American Gladiolus Society. Many helpful pointers will be gained by being an affiliated member.

Respectfully,

E. N. TILTON

Member American Gladiolus Society.
